Notes from IT-ITeS Sector Skills Council

1.   This document outlines the broad scope of coverage. This should be linked with OBF and training delivery plan. OBF (Outcome based framework) reflects the pedagogy used to ensure an expected outcome. Training delivery plan focuses on the sequence of delivery.

2.   Though many NOSs have some seemingly common outcomes, notably core/generic, professional and technical skills, it is imperative to understand the contextual difference between them. For example, writing skills required write design specifications(in SSC/N0501) are different from the writing skills required to prepare a time plan (in SSC/N9001).   Training providers are advised to,

   a.   Embed such skills development in the learning pedagogy for each expected outcome

   b.   Prepare a detailed session plan for training delivery with focus on sequence and duration of training

   c.   Run a diagnostic test to assess prior learning of students and help trainers / students identify the need for gap training, optimal duration, and suitable training methodology. Accordingly, more introductory level sessions may be included in guided or self-paced mode of learning.   E.g. adding some sessions on Functional English or Use of Internet and MS Office.
