"Anthropology is more than a career. It is a way of life. In everything I do, I'm an anthropologist" – **Sharlottaa Neely**

The School of Studies in Anthropology focuses on understanding humans (as a biological and a cultural being) and human behavior through cross-culture perspective. Anthropologists study the diversity of humankind as manifest through time and space. Anthropology is a discipline that uniquely bridges the social, natural and life sciences. Thus, the scope of anthropology is vast and varied.
