## M.Com. (Master of Commerce)

### About the program:

The M.Com. program offered by the Ravishankar Shukla University Raipur Chhattisgarh is a two-year full-time, semester-wise post-graduation program. It consists of a total of four semesters. The program provides education in subjects such as business, taxation, accounting, management, insurance, marketing, finance, banking, and economics. It offers various core and elective papers from different areas of accounting, management, finance, marketing, insurance, banking, and economics. The quantitative papers include statistics, quantitative techniques for decision making, accounting practices, and business. The program also includes a dissertation/project report preparation in the final semester, which involves research project presentation and viva. The primary goal of this program is to cultivate young trained professionals in the fields of academics and businesses as employees and entrepreneurs. The students will also receive exposure through industrial visits, internships/Equivalent Training Programme and educational trips. The program also includes course seminar presentations, assignments, and group discussions to enhance the student's personality skill with Indian knowledge system.

### Program Outcomes:

Upon successful completion of the Master of Commerce in Commerce program, students will be able to:

|     |                                                                                                                                                                                                   |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PO1 | <b>Knowledge:</b> Get theoretical understanding and practical exposure in the field of commerce.                                                                                                  |

**Learning Objective-** This course aims at providing students with an understanding of the Research Methodology.

(a) **Course Outcome (CO):** On the successful completion of the course, the student will be able to:

| S.No. | Course outcome                                                     | CL |
|-------|--------------------------------------------------------------------|----|
| CO1   | Explain the fundamentals and scientific method of research.        | U  |
| CO2   | Formulate and testing of hypothesis.                               | Ap |
| CO3   | Select the research problem and Research Design.                   | Ap |
| CO4   | Examine the sampling and data collection techniques.               | Ap |
| CO5   | Use statistical tools for data analysis and assess report writing. | Ap |

CL: Cognitive Levels (**R**-Remember; **U**-Understanding; **Ap**-Apply; **An**-Analyze; **E**-Evaluate; **C**-Create).

| 1    | <b>Introduction to Research</b> - meaning, objective, nature, scope and significance of research, steps in research process, criteria of good research, type of research methods, research approaches.<br><b>Scientific method of research</b> - meaning, definition, characteristics, basic elements or steps in scientific method, limitation of scientific method.                                                                                                                                                                                                                                                                                                                                                                                         | 15              | 1      |
| 2    | <b>Research problem selection and identification:</b> Meaning, definition, Characteristics and sources of research problem, Identification and Interpretation of problem, The situation analysis and determination of field. How to select a problem area, 7 (seven)- Guiding principles in the choice of a topic.<br><b>Hypothesis in commerce research</b> - meaning, definition, characteristics, function, dimensions, sources, development, importance and types of hypotheses, formation of hypothesis, essential element of a good hypothesis, difficulties in formation of hypothesis, testing of hypothesis.                                                                                                                                         | 15              | 2      |
| 3    | <b>Research design</b> - Meaning, definition, characteristics and objectives of research design, subject matter of research design, steps of research design<br><b>Type of research design:</b> Exploratory, Descriptive research, Experimental research design.<br><b>Deduction and induction methods</b> - Meaning, merits and demerits of deduction and induction Method, Distinguish between deduction and induction method.                                                                                                                                                                                                                                                                                                                              | 15              | 3      |
| 4    | <b>Planning and Organizing the Research</b> - Meaning, definition, importance of data collection, types of data sources, features, importance and limitations of data, <b>Techniques of data collection</b> - Questionnaire, Interview schedule.<br><b>Sampling</b> - meaning, definition and characteristic of sampling, essential concepts of sampling, planning, type of sampling, merits and demerits of sampling, problem of sampling and solutions.                                                                                                                                                                                                                                                                                                     | 15              | 4      |
| 5    | <b>Scaling Techniques</b> - Meaning, Characteristics and need of scaling, some general problem of scaling, measurement in social science, function of measurement, <b>processing the data</b> - Editing, Coding. Tabulation.<br><b>Analysis, interpretation, presentation</b> - meaning, definition and types of analysis, procedure of analysis, basic of analysis, analysis of variables, Interpretation and Presentation of data - meaning and technique of interpretation and presentation, precaution of interpretation and presentation.<br><b>Research report writing</b> - meaning, definition and types of research report writing, different steps in writing report, general principle of preparation of report, structure of report, language and | 15              | 5      |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                  |  |  |
