IPR cell, PRSU, Raipur

This Intellectual Property Right Cell sensitize students, researchers and Faculty members, collaborators regarding intellectual property and provide guidance towards the nature of intellectual property, ownership, exploitation, technology transfer and confidentiality requirements dealing with Pt. Ravishankar Shukla University, Raipur, India.

Pt. Ravishankar Shukla University has formed Intellectual Property Right Policy document for guidance to Pt. Ravishankar Shukla University personnel i.e. Faculty members, researchers, students and collaborators regarding rights and obligations dealing with the nature of intellectual property, ownership and technology transfer. This policy document not only safeguard the intellectual property issues but in addition will also allocate a fair share of the benefits to all those involved in the creation of intellectual property. This will motivate researchers to conduct research, transfer technology and would be benefitted by the outcome of the intellectual property. This policy will encourage an environment of innovation leading to IP in the University. It will be useful in public at large and innovators involved in the IP exercise.

University Institute of Pharmacy PRSU, Raipur

The University Institute of Pharmacy was established with the object of imparting quality education in pharmacy, established in 2001. The Institute offers undergraduate, postgraduate courses and doctoral program in pharmaceutical science under the Faculty of Technology. The institute has been successful in achieving and maintaining high level of research activity that has been duly recognized at national and international levels. The few faculty members of the institute were recognised by Stanford University, U.S.A. under 2% of scientist across the world. Initially, the institute was placed 22nd ranking by NIRF, Ministry of Education, Government of India It has attracted funding from various organizations such as AICTE, UGC, CG-COST and DST. The mission of the Institute is to generate leaders in the field of pharmaceutical industry, education, research and the profession and to lead in education and research that benefits patients and the prevailing healthcare practices at large by educating students..

Short Term Course

Higher education has immersed on the discovery of new knowledge, which can interpret into intellectual property, but higher education and legislation policy, and/or contractual engagement may recite ownership or opportunities for ownership of intellectual property by those involved in the discovery process. The primary focus of IPR and its Policy is towards promoting innovation and creativity in higher education institutions. Discovery and knowledge dissemination is to be a key component of any university mission. The research and the discovery of new knowledge has traditionally been encouraged by universities, federal and state legislation has also been a means to accomplish university-based research and convert that research into economic gain. Applied research has been more economic value because of, designed to solve practical problems of the modern world. In recent years, universities have taken the approach regarding intellectual property that all inventions, patentable products, or copyrightable materials are subject to university policy, which typically gives the university first claim to the right of ownership and fund after commercialization. Researchers understand the technology and science involved. administrators, technology transfer departments, faculty, students, private investors, local governments, and attorneys all have become important players in determining how intellectual property can and will be used for common people of the country and the world.

Objectives

1. To enhance awareness about Intellectual Property Rights (IPRs) to take measures for the protecting their ideas and business strategies.
2. Effective utilization of IPR tools would also assist them in technology upgradation and enhancing competitiveness.
3. To significantly raise the level of awareness and interest/knowledge about IPR issues.
4. To develop a broad understanding of the need to integrate IP in their innovation strategies business planning.
5. To improve protection of IP achievements through increased registration of rights and increased use of non-registered protection methods.
6. To improve the protection and enforcement IPR from infringements.
7. To enhance capacity to fight counterfeiting.
