Center for Basic Sciences (CBS)

The Center for Basic Sciences was established in the year 2015 in the campus of Pt. Ravishankar Shukla university, Raipur. It was conceived to give an opportunity to all those talented students out there who find a scope for higher studies in the field of basic sciences.

Despite being the existence of eminent institutions like IITs IISc, IISER, and NISER, the country is going through an acute dearth of good scientists and teachers. Owing to such needs of the state and the nation, the Government of Chhattisgarh responded proactively to the proposal of CBS by generously providing the seed money to Pt. Ravishankar Shukla university for its establishment and assured a continuous support in the coming years.

The principal aim of CBS is to impart high quality undergraduate education amidst vibrant post graduate research environment with emphasis on the experimental component within a multi-disciplinary framework. It is also making education and career in basic sciences more attractive and approachable by breaking the barriers of taking up traditional disciplines.

Vision:

- The prime motive of CBS is to motivate talented 12th graders to take-up basic science as their career undertaking
- To provide high quality teaching in basic sciences by a faculty of distinguished scientists embedded in a vibrant research environment and to create a national pool of scientists ready to take up research challenges in the frontiers of basic and applied sciences.
