About SoS in Library and Information Science

The School of Studies in Library & Information Science was started in 1971 with B Lib. I. Sc. course with the objective to enable the students to understand the functions and purposes of the library in the changing social and academic set up of society, and to train students in the techniques of librarianship and management of libraries. In 1988, M Lib I Sc course was started to give the students specialized knowledge of the vital role of Information as an input and to impart them necessary skills in designing, operating and managing Information system.

In view of the emerging networked environment and paradigm shift in the goals of the library, and in view of the changes in information storage and delivery mechanism, the school retrained its syllabus on the basis of the UGC model curriculum and NEP-2020.

Research guidance at the level of the Ph D is provided. The school has a well-equipped computer laboratory for imparting practical knowledge to the students. Presently 28 scholars have been awarded with Ph D degree, and the research works of 8 scholars in progress.
