Objective

- The objective of the seminar is to incorporating the awareness from various field of pharmacy and to emphasize the current and emerging development of pharmaceutical science. The seminar may provide a platform for open discussion among the students, delegates and experts.
- To develop and enumerate the various strategies employed to improve the success rates in the pharmaceutical research and development.
- To understanding of novel approaches has led to the development of specific drug delivery systems to pharmaceutical research. Increasing trends in pharmaceutical technology and new emerging techniques have been growing very fast.
- To enlighten the knowledge of significant novel approaches and technologies, as well as novel methods for pharmaceutical research, has emerged to meet this basic requirement

Background

Research is critical for growth in any technological sector, including pharmacy. As we transition through and beyond this pandemic, which will have long-term consequences for our society, including research, it is critical to recognize and address research opportunities and problems in order to grow the scientific workforce. Motivating more academics to produce breakthrough research results is a pressing need of the hour. The University Institute of Pharmacy is hosting a two-day National Seminar on "Exploring innovative techniques and emerging trends in pharmaceutical research". This will provide an opportunity for new and experienced researchers and students to learn about recent advances in pharmaceutical technology. We hope that by this seminar, we will be able to bring together professionals in this industry from throughout India to interact, learn, and network. Participants and Experts from different fields of pharmaceutical science, novel drug development, Nano-technological based advancement, and other allied scientific backgrounds of research will be brought together at the seminar, and they will have the opportunity to network with various industry professionals, including pharmaceuticals, biologics and other experts. This seminar will provide a forum for attendees to exchange, communicate, and stay updated on current pharmaceutical research issues. It will also provide an opportunity for all attendees to meet with professionals and discuss recent advances, issues, and innovations in the area.
