

Seminar Announcement **Carbon Credits and Food Security**

School of Life Sciences, Pt. Ravishankar Shukla University (PRSU), Raipur, is going to organize **One-Day Seminar on Carbon Credits and Food Security** on **March 22, 2013** under the joint auspices of School of Life Sciences and the Chhattisgarh Council of Science & Technology. On behalf of the Local Organizing Committee it is our pleasure to invite you to participate in this Seminar.

Global warming is a universal concern. To decrease the environmental temperature, it is essential to decrease the emission of greenhouse gases (GHGs). Fortunately, in India, the emission rate of GHGs is below the permissible level as well as less than any developed country. This provides an opportunity to India for earning carbon credits. Further, gradual increase in global population is threatening the food security. The former leads to the malnourishment and food scarcity in developing and under developed countries. This problem may become more severe and amplify many times in the coming years. Therefore, it is worthy to come out with innovative ideas to resolve these problems. Undoubtedly, this seminar will provide a platform to young minds and renowned scientists to discuss these issues.

In this seminar, the major focus will be given to addressing the current status and future prospects of carbon trading. In addition, the impact of increasing global population on food security will be discussed.

The seminar will include about four invited talks and a panel discussion.

Register yourself on/or before **March 15, 2013** [*No Registration Fees will be levied*].
